

## Dump trucks from Hydrema now also equipped with Lochmann cabins

### Compact, safe & agile - the 707G dump truck

The 707G offers all the advantages of a larger knuckle boom dump truck combined with the compact size of a conventional construction site dump truck. The requirements of this cabin were high and the goals were ambitious. The challenge of the Hydrema MX mobile excavator cabin, which was developed within 2 years, was to use as many of the same parts as possible from the existing cab and while at the same time meeting the high special requirements of the cabin.

Operator protection, ergonomics, excellent all-round visibility and high stability despite impressive maneuverability were not allowed to be neglected and were the focus of the development. A one-step entry and certified protection against rolling over (ROPS test) and falling objects created a safe cabin and workplace by Lochmann Kabinen GmbH.

You can take the 707G with our cabin to places where other machines would fail to operate.

The challenge not only accepted but implemented and the goal excellently achieved these are the strengths of Lochmann Kabinen GmbH.

Lochmann Kabinen GmbH has been manufacturing cabins since 1983. Quality and innovation of the cabins have always been our focus. Our experience is highly valued by our customers because we know what the market needs. Many years of know-how enable us not only to respond to the needs of our customers, but also to implement them in the cabins - for the satisfaction of our customers.

Our strength lies in the development and production of cabins in various sectors: cabins for agricultural machines, municipal vehicles, earth-moving machines, but also cabins for industrial and special vehicles are to be found in our wide range of products.
